The ASC Electronic Shift Console has been designed especially for non-dealer service centers that require the ability to exercise multiple transmissions outside of the vehicle in conjunction with our family of transmission test stands during testing.

Features

- Durable, portable, self-contained industrial grade cabinet
- Designed for use with any transmission test stand or dynamometer
- System is supplied with a touch-screen computer loaded with our Shift Command software.
- Easily switch between shift profiles
- Eliminates the expense and need for multiple TCUs
- Convenient quick disconnects for fast changeover
- Easily upgradable to accommodate for future testing needs

Options:

- Shift profile(s) and test harnesses are ordered separately to match your testing needs
- Kits are available for several transmission models including; Allison, GM, Ford and ZF.
- ATEC Shift Control option available
