

Actual products may differ
from images shown

Specifications:

Power:	268 hp (200 kW)
Torque:	590 lb-ft (800 Nm)
Speed:	8,000 rpm
Water Use*:	37 gpm (140.1 lpm)
Inertia Value:	3.73 lb-ft ² (0.157 kg·m ²)
Shipping Weight:	1,863 lb (845 kg)
Rotation:	bi-directional

*No Cooling System

For overhung loads, such as a belt or gear drive, please contact us to ensure that the system will meet the required performance needs

Recommended Accessories:

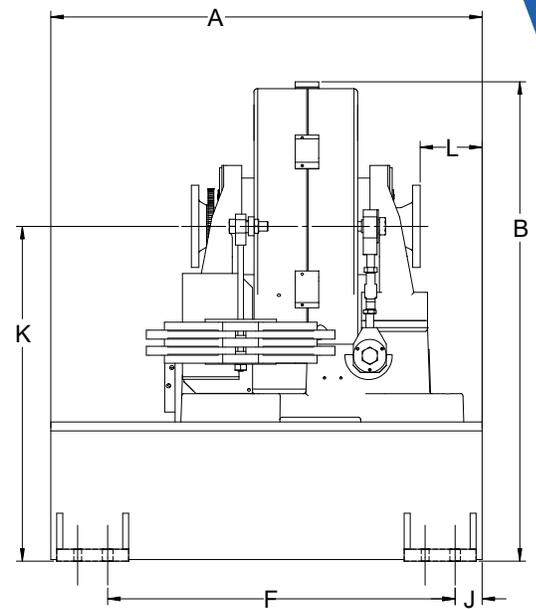

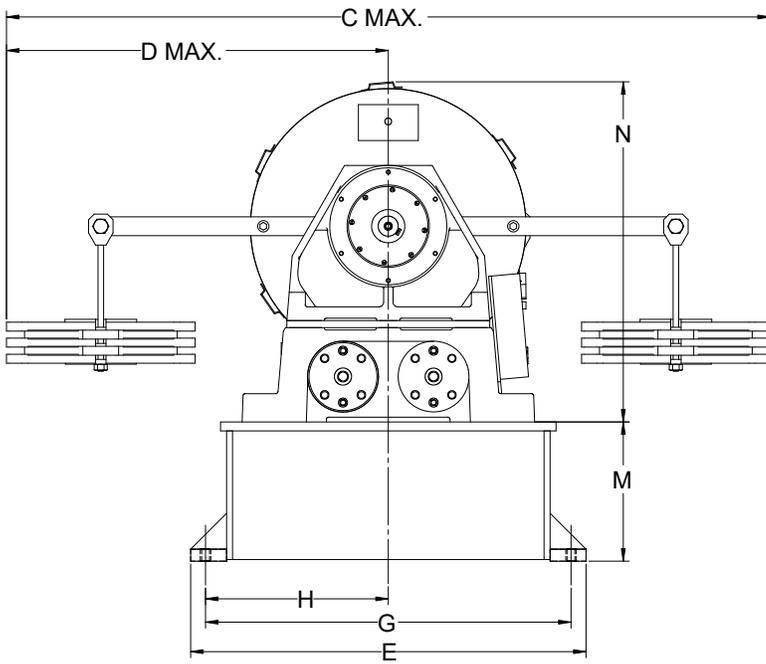

- Driveshaft
- Driveshaft Guard
- Adapter Plate Kit
- Engine Cart
- Cooling Column
- Charge Air Cooler
- Water Recirculating System

As a safety precaution, we recommend a torsional analysis to uncover any potential torsional problems that exist for each application. This analysis will identify any torsional issues (frequencies) that should be fixed prior to operation. Excessive linear vibration may also create problems that must be mitigated for continued operation. It is the customer's responsibility to ensure that these vibration issues are addressed upon application of the dynamometer. Equipment failures attributed to linear or torsional vibration are not warrantable.

Power Test®, LLC, an industry leader in the design, manufacture and sales of dynamometers, specialized test systems, and related data acquisition and control systems. Power Test, LLC, offers a comprehensive portfolio of brands including Power Test, Taylor Dyno™, Dyne Systems™, SuperFlow®, Axiline® Precision Products, Hicklin® Engineering, Stuska® Dynamometer, and Torque Converter Rebuilding Systems (TCRS™), that have long been the standard for quality in the testing industry. As your equipment testing partner for innovative products and comprehensive life-cycle services and support, we are dedicated to delivering an exceptional experience by offering specialized solutions to Make Your Testing Easy.
